

Build a Nest

Supplies:

- Two handfuls of small, flexible twigs (size of a palm)

These will form the main shape of the nest. Hard, short twigs are best.

- Bend the stems into a loop

Grab a thick handful of the stems, and bend them into a U shape to form a full circle. Shape the rest of the nest by grabbing a second, smaller handful of stems and shape it into a smaller loop.

- Handful of leaves or scrap papers or fibers

Decorate with scavenged materials.

*Items should be found outside to resemble what birds gather for their nest
